

Dylan

My first educational goal will be to graduate college with my Associates Degree in Informational technology (IT). I then see myself pursuing a job within the IT workforce, if i feel like this is something I really enjoy doing and want to learn more about it. I will then go back to Sitting Bull College to pursue my Bachelor degree in IT. I will use my education to impact the native community by pursuing a degree and then coming back and applying for a job at Indian Health Services on the Cheyenne River Sioux Tribe, or on the Standing Rock Sioux Tribe. Getting a job in one of these places can help show others with disabilities on the reservation that you shouldn't be scared to reach for your goals but instead achieve them.
