

## April

I have been a full-time student for the last four years at Lower Brule Community college and Sinte Gleska University. Receiving my AA in 2023. Uncertain if college was even for me (my first year I struggled) but after that I have since grown to like it. It keeps my mind strong and keeps me busy. So that's when I thought, why not keep working towards my BA in Human Services. It helps me to get a better understanding and insight into things, and I can help in these areas. I am furthering my education in this field so that I can come back to the native communities and help people who are struggling with mental conditions, providing therapy and counseling in various areas like talk therapy, group therapy and for their well-being. Working to help with prevention and education in mental health issues before they start.
